Dehradun, Uttarakhand, India

SUMMARY

Full Stack Web Application Development professional (SDLC, MERN stack) skilled in RESTful API design, component-based architecture, state management, responsive web design, and UI/UX. Experienced with cloud deployment, CI/CD, version control (Git), and Agile practices, with a focus on scalable architecture and performance optimization.

EDUCATION

DAV PG College, HNB University
BSc in Information Technology

Uttarakhand, India
Oct. 2023 – Aug. 2026

PROJECTS

AI-Powered SOP Generator | *React, Node.js, Express, MongoDB, Zustand, Groq AI, PDFKit, JWT, Tailwind CSS*

- Engineered a full-stack SaaS **web application** using the **MERN stack** with a **component-based architecture**, converting process descriptions into structured SOPs via **Groq AI** (Llama 3.3-70b)
- Implemented **JWT-based authentication**, **multi-tenant** workspace architecture, and Express **middleware** for request validation, with SOP search and management functionality
- Built **PDF export** using PDFKit and Zustand-based **state management**, and deployed via **CI/CD** to Vercel (frontend) and Render (backend) with **MongoDB Atlas** for a **scalable, cloud-based**, high-uptime architecture

Food Delivery Web Application | *MongoDB, Express.js, React.js, Node.js, Socket.io, JWT, Razorpay, Cloudinary, Redux Toolkit*

- Developed a **responsive, single page application (SPA)** food delivery platform with real-time order tracking via **Socket.io** between customers and restaurants
- Integrated **third-party APIs** (Razorpay for payments, Cloudinary for images) with custom **middleware** for request handling and error management
- Implemented **RBAC** and **authentication & authorization** for customers, admins, and delivery partners using JWT and bcryptjs, plus an interactive delivery map (React Leaflet) and analytics dashboard (Recharts)
- Used Redux Toolkit for centralized **state management**, improved app **performance** through **debugging** and optimization, and added Nodemailer/Firebase for transactional email and auth

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, HTML5, CSS3

Frameworks/Libraries: React.js, Next.js, Tailwind CSS, Shadcn UI, React Router, Redux, Redux Toolkit, GSAP, Node.js, Express.js

Backend & Databases: RESTful API Design, API Integration, Middleware, Microservices Concepts, Authentication & Authorization, Application Security, MongoDB, PostgreSQL, Firebase

Frontend & Design: Responsive Web Design, Single Page Applications (SPA), Component-Based Architecture, State Management, UI/UX, Cross-Browser Compatibility

Practices & Cloud: CI/CD, Cloud Deployment, Scalable Architecture, Performance Optimization, Debugging, Agile/Scrum, SDLC, Version Control (Git), GitHub, AWS (EC2, S3, CloudFront), Vercel, Railway, Postman, Cloudinary, Socket.io

CERTIFICATIONS

Web Design — freeCodeCamp
Frontend Developer (React) — HackerRank

LANGUAGES

English, Hindi
